

1.

Temperature sensor

Temperature sensor TF104/105/106

Safety temperature sensor
temperature sensor TF106

Two temperature sensors
for monitoring and averaging

2.

Steam inlet

Steam bath nozzle with steam protection cowl for steam injection into the cabin

Steam hose

Fogmaker (mixing tube)
alternative to steam nozzle

Reducing kit
DN40 to DN25

3.

Control

Spa Touch Control
5" touch display for external control

Spa Remote Touch Display
3.5" touch display for external control

Push-button / switch function
for steam jet, ECO, etc.

Relay circuit board
for supply and exhaust fans, essence pump, light, etc.

Lite Version
for exhaust fans, essence pump, light, etc.

4.

Supply and exhaust air

Control of second supply / exhaust fan
for temperature control

Tube insert fan
for supply / alternatively exhaust air over 100 HT-pipe

5.

Essence

Essence pump

Non-return valve for essence
prevents the reflux of the essence at the point of feed-in

Exhaust filter for essence
for essence intake from the container

T-piece
for essence feed or condensate drainage

6.

Service life

SuperFlush
for improved lime management

HyFlush
for improved lime management and significantly longer maintenance intervals

7.

Water inlet

HyFlow / system separator
protects drinking water from contamination (for electrode units)

System separator
protects drinking water from contamination (for heater type units)

8.

Water outlet

HyCool
integrated waste water cooling
